

## **Questions to CC**

### **Q - Multiple touchdowns being scored by same player and the touchdowns are worth less:**

Some teams have found ways around this – having the same player take the ball to the goal line then another player scoring the TD. This will be reviewed by the Competition committee.

This question did not go to the competition committee. It was dealt with at the division level for 2022 and monitored. The ED and Division Director monitored this for 2022. Because there is a strategic component to this issue, in close games, the following will be taken to the competition committee for approval for the 2023 season.

Gameday officials will monitor players going down on the one-yard line. In games where they feel the game is close and it is a strategic move it will be allowed. In games where they feel the team is running up the score, a flag will be thrown, and a 10-yard objectional conduct penalty will be called. It will be a Judgement call.

### **Q – Had concerns about the Atom division and how players play 2 games on defense then 2 games on offense in the first half of the season.**

This will be reviewed as it is hard on the coaches and hard for game day to police. The Competition committee will assess.

This was dealt with and removed by the Competition committee.
